Epi crew:

I made it through most of the Cancer sections for an initial Tiering attempt. While digging into this, some issues were flagged that may be of interest for other sections (or maybe not). Ex. 5 Deliberative Process (DP)
Ex. 5 Deliberative Process (DP) is. I would
to clarify or further discuss down the road. Have a great holiday break (am out rest of the week),
Mike
PS: There are also a few comments regarding Appendix Table B-42 and the TR draft at the end.

Subject: RE: EWG: New Task - Formaldehyde

Hi All,

Two things:

1. Wanted to check in on how things are going with the assigned formaldehyde tasks. Quick status update would be nice.
[Example: I've met with Catherine, Sury, and Nagu to figure out what tasks are feasible for me to do to help with the genotox section in the limited time frame. I've now been asked to provide a synthesis of the human genotox data and have been making my way through the cited 45 papers.]
2. Cynthia Yund (NHSRC) will be joining our workgroup (part-time via a detail). With formaldehyde being front and center, is there anything from your assigned task that can be carved out and given to Cynthia to work on? If you're blessed with having to work on Libby or phthalates while working on formaldehyde, is there a task from those assessments that she could work on?

Please provide an update and let us know if you have any potential projects for Cynthia (she'll be on our watch next week).

Thanks,

Amanda and Krista.

Subject: EWG: New Task - Formaldehyde

As realized from today's brief short-noticed meeting, more members of the epidemiology workgroup will have to step into the formaldehyde black hole. So here's the plan to make the October deadline. It is my understanding that this trumps everything but Libby.

Please correct if I transcribed the assignments incorrectly.

Glinda and Barbara - continue to revising assessment-assigned sections

Tom – work with David, Mike and Audrey (see below)

Amanda - hematological and cytogenic effects section (consult with Catherine Gibbons, get info from Barbara)

Audrey – address comments that related to redundancies (talk to Tom for details)

Mike – rework cancer section to align with updated grouping system (talk to Tom for more details)

David Bayliss – make table for laryngeal cancer, making first pass(Barbara and Tom will contact to provide more information)

Mefruz – once David is done with tables, send to Mefruz to create figure.

Amanda
